ALEXANDRIA, VA 22313-1450

SIR:

Applicant acknowledges with appreciation the indication of allowability of the claimed invention. In response to the Examiner's Statement of Reasons for Allowance in the Notice of Allowability of September 9, 2008, Applicants respectfully submit the following comments.

In the Examiner's Statement of Reasons for Allowance on pages 2 and 3 of the Notice of Allowance mailed September 9, 2008, paragraph 3 states in part:

With regards to claim 1, the examiner cannot find any motivation and suggestions disclosing extracting features from said delta image for obtaining a potential dynamic patch which is compared with dynamic patches previously recorded in a first repertory which is progressively constructed in real time from an initial void repertory in combination with the rest of the limitations of claim 1.

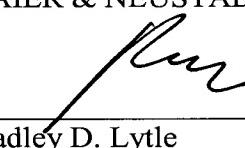

With regards to claim 15, see the rationale for claim 1.

The above comment does not appear to be accurate with respect to independent Claim 15. For example, Claim 15 recites "comparing a potential dynamic patch which is compared with dynamic patches previously recorded in said first memory means" and not "a potential

dynamic patch is compared with dynamic patches previously recorded in a first repertory which is constructed in real time from an initial void repertory.” Accordingly, it is respectfully submitted that the above quoted statement does not apply to independent Claim 15 and dependent Claim 16.

Respectfully Submitted,

OBLON, SPIVAK, McCLELLAND,  
MAIER & NEUSTADT, P.C.
